

# Anything Goes

VIRTUAL ENVIRONMENTS

# FIRST OF A KIND

A world first, turnkey solution built and delivered here in South Africa.

Bringing people together in a bespoke 3D environment.

No set builds, no large crews, no need to travel.

Brought to you where you are, delivered to everyone.

## WHAT IS IT?

In a world suddenly dominated with 2D video, we needed a way to bring some of the show back into what we do, so we developed a custom solution to grab attention, a bespoke 3D environment that connects all of the tools you've become used to, Zoom, Google Meet, Facebook Live etc. in one end-to-end beautiful solution.

Live and communicating in every direction simultaneously, in an environment that is uniquely yours.

# CUSTOM BUILT 3D ENVIRONMENT

# HOW CAN I USE IT?

## APPLICATION

*(Live Broadcast with hosts and guests in multiple separate locations, anywhere in the world)*

- TV / Award Show
- Conference
- Presentation
- Formal Address
- Product Launch/Demo
- Trade Show
- Event
- Festival

# HOW DOES IT WORK?

## INTEGRATED CONNECTION

*(Guests & Hosts can communicate across multiple software solutions simultaneously)*

- Live Hosting  
*from anywhere via green screen*
- Conference/Meeting Software  
*Zoom, Google Meet, Microsoft Teams, etc.*
- Streaming Platform  
*Facebook Live, YouTube, Twitch, Periscope, TV etc.*
- RTMP Servers
- Proprietary Video
- Prerecorded AV Content

# FEATURES

## CUSTOM VIRTUAL ENVIRONMENT

Your imagination is the only limitation!

We can design the perfect custom environment for you.

As many virtual screens as you need, make the environment as realistic or as futuristic as you desire.

We can bring your dream to life.

## NEXT LEVEL VIDEO RECORDING & STREAMING

Full turnkey solutions for recording, both for prerecords as well as live to air.

Dedicated reliable streaming into your portal or ours.

We don't just stream to any of the off-the-shelf video conferencing platforms, we let you deliver & engage directly from your virtual environment.

## 3D ELEMENTS

Beyond custom environments, whatever you can imagine can be modelled in 3D and choreographed for live interaction.

How about revealing and interacting with real 3D objects?

Drop your product or key message into the environment and change the way you present/interact with your message.

## TELEPORTING

Teleport hosts (or guests) from anywhere in the world into your bespoke environment and let them collaborate in real-time.

This powerful feature is unique to our product.

Our compact remote solutions can be deployed anywhere in the world.

## REAL-TIME FEEDBACK

Integrated tools to deal with Q&A's directly from social media.

Hashtags or feed search integration to see your community react in real time.

Facebook, YouTube, Instagram and Twitter all supported.

## GLOBAL PRODUCTION

The world in the palm of your hand, from anywhere to anywhere.

Fully remote production services hosted on powerful and secure cloud-based solutions.

Team of global experts collaborating on your show from anywhere in the world, simultaneously.

# VIRTUAL EVENT DEMO

# ANYTHING GOES VIRTUAL SHOWCASE

On Tuesday May 12th, we broadcasted a fully Live demonstration of this new technology to Facebook Live.

Hosted by two remote presenters, Shaun Duvet of AG in Cape Town and South African icon DJ Fresh in Joburg, presenting a conceptual showcase in a custom built 3D environment delivering real-time engagement between presenters and a Zoom room of exclusive attendees.

A Heavy Chef segue saw Fred Roed bring in Flexyforce's Annette Muller joining Shaun on screen via proprietary video links.

All while the AG team were "in the room" via a Google Meet.

Live, realtime, multi-platform integration for shows, events, product launches, even perhaps a festival.

Only limited by your imagination... and your budget.

# AG VIRTUAL SHOWCASE DEMO

The system is completely scalable with the capacity of interaction as limited or as open as required:

- A full capacity Zoom can easily be integrated and managed to orchestrate a large scale Q&A, for a global product launch, for example;
- A 6-way to 1 conversation panel of key stakeholders can be setup to run a conference, talk or TV show.

## REGISTRATION

Secure and customizable registration system, allows for you to capture your own data about your attendees allowing you to better understand your audience when you connect with them again later.

## PAYWALL

Our highly secure system is backed by an internationally acclaimed network which allows fast and secure access.

We support universal payments, across currencies with mixed tariffs and accept all major credit cards as well as Paypal.

## CONFERENCING INTEGRATION

Direct integration with all major video conferencing platforms, including: Zoom, Teams, Meet and Skype.

We create bidirectional communication on these platforms letting you interact and engage with your guests, your teams and your audience, simultaneously.

## SOCIAL MEDIA INTEGRATION

Stream directly to any social media platform meeting your audience where they prefer.

Including Simulcast (simultaneous broadcast) to multiple platforms at the same time.

Facebook, YouTube, Twitch, Vimeo, any other RTMP platform and more, are all supported.

## WHITE-LABELED MEDIA PLAYER

Stream your content without the fear of takedowns, no removals by inaccurate algorithms.

Customisable and ownable. Keep your content Yours!

Dedicated video call lines into the virtual environment to bring a more personal touch to your presentation.

## LOCALLY HOSTED / INTERNATIONALLY DISTRIBUTED

Our servers are hosted locally guaranteeing a reliable, stable and owned stream with no long trips (and room for error) to international ingest servers.

Your content can then be distributed securely to international CDNs (Content Delivery Network) allowing a responsive and reliable experience for all your viewers.
